Holt Public Receives Hewlett Packard Enterprise Disaster Relief

Foundation Grant – Holt Public has been actively working to provide exterior internet access points across the district. To that end, Holt Public has recently received a product donation of six outdoor WiFi access points from Hewlett Packard valued at \$22,379.

“We are excited to expand our wireless network,” said Superintendent, David Hornak. “We understand starting the school year remotely posed some connectivity issues for some of the families we serve. By installing some exterior WiFi access points outside of our buildings, we are providing another option for our learning community to connect with our educators. We acknowledge that remote learning is not the same as face-to-face instruction, however, the health and safety of our stakeholders continues to remain our priority,” Hornak said. These exterior WiFi access points will serve as additional infrastructure to ensure our learning community has the ability to connect with us. The exterior WiFi access points have been placed in the following parking lots:

- Dimondale-West
- High School: Main Campus-Northeast
- Horizon-North
- Elliott- Northeast
- Sycamore-North
- Midway-South

The grant was written and submitted by Director of Information and Data Systems, Mr. Kevin Galbraith. “I appreciate Kevin’s vision and willingness to upgrade our infrastructure to expand our connectivity options during these unprecedented times,” said Hornak.
