## How to Get Microsoft Office on your Home Computer

It's pretty easy and you have 15 licenses available. Five for Apple iOS devices (iPhone, iPads), five for MacOS computers (iMacs, Macbooks), and five for Windows devices (Windows 10, Windows 7, Surface tablets, etc.)

When you're on that computer at home, log into <u>Holt's Office 365 portal site</u> with your email address (username@hpsk12.net) and your password.

When you in, click "Office 365" in the top-left banner area of the page.

When the page reloads, you'll see a link to install on the top-right part of the screen.
